DESCRIPTION

With the new range of table-top single clippers, BECK CLIP SYSTEMS focuses on reliable, lightweight models that are easy to set up and maintain. The clippers are made of the highest quality stainless steel and composite materials, and they comply with the latest safety and hygiene standards. Natural and artificial casings, nets, and bags are closed securely and gently. The BCS-700SC table-top single clipper handles four clip dimensions from the XS-HDF series (Made by BECK, XS-HDF dimensions are similar to the S-735 series). This clipper is also available in several options: with an automatic trigger (BCS-700SCA), in a horizontal model (BCS-700SC-H), and in a horizontal model with an automatic trigger (BCS-700SCA-H).

APPLICATIONS

Specially developed for the food industry and universally applicable to all natural and artificial casings. Moreover, this clipper is very well suited for non-food applications. The BCS-SCA model with an automatic trigger is ideally suited for bagged products such as poultry, while the horizontal models are perfect for sealing non-standard casings and liquids, like soups.

ADJUSTABLE CLIP CLOSURE

The stroke limit can be adjusted manually, allowing the clip closure to be tailored to the sensitivity of the material or the required tightness.

BASE CHARACTERISTICS

Width	Length
240 mm	280 mm
9.45"	11.02"

CLIPPER CHARACTERISTICS
