

ALUMINIUM CLIPS

ALUMINIUM CLIPS

Aluminium clips are available in all standard market sizes and various hardness grades. They are a perfect match for our clippers, although they are also completely compatible with all common clip machines from other manufacturers. Our portfolio comprises U-clips that are available in strips and on spools or reels. All CLIP SYSTEMS aluminium clips can be formed into flat clips or roll clips and feature strongly rounded and brush-finished ends to prevent any damage to the casings. The additional wax coating protects even sensitive materials, such as natural sausage casings.

COLOUR CODE

Coloured clips allow batches to be identified visually for tracing purposes. The clips are available in seven different colours: silver, red, blue, green, yellow, black and white.

COLOUR OPTIONS

- Completely coated – the wire is completely coloured
- Partially coloured – the clips are only coloured on the outside

ALUMINIUM CLIPS

APPLICATION

- Clipping meat and sausage products in artificial and natural casings
- Packaging poultry and cheese in plastic bags and films
- Packaging fruit and vegetables in nets and sacks
- Closing bags for live fish transport
- Packaging non-food products (chemicals, medications, pet food, and much more)

ASSORTMENT

- Ø from 1.72 to 3.40 mm | from 0.07 to 0.13 inch
- Inner dimension from 6.50 to 12.50 mm | from 0.25 to 0.50 inch

TOOLS

- BECK Clip Systems
- Tipper Tie/Technopack*
- Poly-clip*

Flat Clips

are recommended for sensitive packaging materials, such as natural sausage casings. The rounded and brush-finished ends of the clip close softly without doing any harm to the material.

Roll Clips

are especially suitable for robust packaging, such as artificial sausage casings and wherever an extremely leakproof closure is required, such as vacuum bags or packaging of liquids.
